

Integrated Management System Policy

City Cement Factory
P.O. Box:1, Marat-11933
Riyadh Province
Kingdom of Saudi Arabia

OUR MISSION

At City Cement Company, we are committed to delivering high-quality clinker and cement products through safe, efficient, sustainable, and energy-conscious operations. We strive to create long-term value for our customers, employees, shareholders, and society by promoting operational excellence, environmental stewardship, responsible asset management, innovation, and continual improvement.

OUR COMMITMENTS

To achieve this commitment, City Cement Company is dedicated to:

Quality & Customer Satisfaction (ISO 9001:2015)

- Complying with all applicable legal, regulatory, statutory, customer, and other subscribed requirements related to quality, environment, occupational health & safety, energy management, and asset management.
- Understanding the context of the organization and the needs and expectations of interested parties relevant to our Integrated Management System.
- Providing the necessary information, resources, competent personnel, infrastructure, technology, and organizational support to establish, implement, maintain, and continually improve the effectiveness of the Integrated Management System.
- Establishing, monitoring, reviewing, and achieving measurable objectives and targets aligned with the strategic direction and business goals of the organization.
- Enhancing customer satisfaction through the consistent provision of products and services that meet customer and applicable requirements while addressing risks and opportunities affecting product quality and business performance.
- Promoting a culture of operational excellence, risk-based thinking, innovation, and continual improvement.

Environment (ISO 14001:2015)

- Protecting the environment, including the prevention of pollution and minimizing adverse environmental impacts.
- Supporting climate change mitigation initiatives through reduction of greenhouse gas emissions and increased utilization of alternative fuels and raw materials.
- Promoting circular economy principles through responsible waste management and beneficial utilization of industrial by-products.
- Improving environmental performance through efficient use of raw materials, water, energy, and other resources, while reducing waste generation, emissions, and other significant environmental impacts.

Occupational Health & Safety (ISO 45001:2018)

Integrated Management System Policy

City Cement Factory
P.O. Box:1, Marat-11933
Riyadh Province
Kingdom of Saudi Arabia

- Providing safe and healthy working conditions for the prevention of work-related injury and ill health and maintaining a workplace that is free from unacceptable risks.
- Eliminating hazards and reducing occupational health and safety risks through application of the hierarchy of controls and effective risk management processes.
- Ensuring consultation and participation of workers and, where they exist, workers' representatives in matters affecting occupational health and safety performance.
- Fostering a proactive safety culture.

Energy Management (ISO 50001:2018)

- Supporting the procurement of energy-efficient products, equipment, services, and technologies to enhance energy performance and reduce energy consumption across our operations.
- Considering energy performance improvement opportunities during the design and modification of facilities, equipment, systems, and processes that can significantly affect energy performance, in accordance with ISO 50001:2018 Clause 5.2.
- Continually improving energy performance, energy efficiency, energy use, and energy consumption through the effective implementation of the Energy Management System.
- Ensuring the availability of information and resources necessary to achieve energy objectives and targets and maintain the effectiveness of the Energy Management System.
- Establishing and reviewing energy objectives, targets, and performance indicators.
- Supporting Saudi Vision 2030 through responsible energy management.
- Promoting optimization of thermal and electrical energy consumption, alternative fuel utilization, and waste heat recovery.

Asset Management (ISO 55001:2014)

- Managing physical assets throughout their lifecycle to deliver value to the organization and stakeholders while balancing performance, cost, risk, sustainability, and compliance obligations.
- Applying a risk-based and value-driven approach to asset management, ensuring that asset-related decisions support organizational objectives and long-term business sustainability.
- Maintaining asset integrity, reliability, availability, and performance through effective planning, operation, maintenance, monitoring, and continual improvement practices.
- Optimizing asset lifecycle performance through reliability-centered maintenance and digitalization.

Sustainability and Corporate Responsibility

- Supporting sustainable development principles.
- Contributing to the Kingdom's sustainability objectives through responsible resource management and emissions reduction.

Continual Improvement & Innovation

- Promoting innovation, operational excellence, digitalization, and the adoption of best available technologies to improve quality, environmental performance, occupational health & safety, energy performance, and asset management outcomes.
- Continually improving the suitability, adequacy, effectiveness, and performance of the Integrated Management System to enhance organizational resilience and sustainable growth.

We are committed to communicating this policy to all persons working for or on behalf of the organization and making it available to relevant interested parties. Through leadership, employee engagement, consultation, participation, and a process-based approach, we will ensure that this policy is understood, implemented, maintained, and reviewed for continuing suitability in support of our business objectives and long-term sustainability.
